Hygiea helps us take all of our Planetary Archetypes to their highest calling while cleaning everything up upon her path. Her five tones span four octaves giving us the opportunity for accelerated consciousness expansion during these transformational times.

This advanced training delves into the powerful multidimensional applications of our new four-octave, 5 tuning fork Hygiea Set. We explore the science, mythic and archetypal literature envisioned through not just what we know of Hygiea but the ways she invites shifts to our long-held perceptions as well as the role of planetary discovery in the evolution of human consciousness and conduct. Her vibratory relationship with each of the planets and the new intervallic, archetypal, and practical relationships are explored. Hygiea and the use of these new octaves play an essential role in deepening our treatment strategies at a critical time in our advancement of the sciences, art, ecology and civilization.

This is a 24 hour class, expanded over 3 days, 6 hours each day, for a more relaxed and integrative experience.

Required to become a Certified Acutonics® Practitioner
