Class Details:

Sedna, the superconductor, represents non-duality, super-creativity, paradigm shifts, and synchronicity. This core course provides advanced students of Acutonics with a vehicle to explore the many attributes of the Planet Sedna .

This newly discovered planet has deep ties to indigenous cultures, Hopi and Mayan prophecy, the Inuit, and the taproot of Oriental Medicine. Students will learn about the science, morphology, mythology, astrology and archetype of Sedna, and the key healing themes that unfold for humans, animals, the environment, and the planet. The class also examines the latest theories in physics, pole shifts, and astrobiology.

You will learn new intervals that are based on Sedna as a new fundamental or home tone, which supports a deep, highly transformational journey, and expands your understanding of the Extraordinary Vessels. Come deepen your understanding of how to incorporate shamanic tools within your Acutonics treatments, through daily practicums, while immersing yourself in the sacred mountain nestled among the crystal clear blue waters of the Sea of Cortez, home of the largest mammal on earth, The magnificent blue whale.

Come journey northward with us afterwards for our amazing Sedna Integration Spirit Adventure Journey, March 25 – 27: Truly a life changing, heart opening experience as we connect through sound with the grey whales and their babies within the birthing sanctuary of Magdalena Bay. 12 Acutonics Clinical Hours available.

Sedna shares her gifts and helps us to navigate the cycle we are all going through at this present time. Learn where Sedna is located in your astrological chart and what this signifies.

Prerequisites: Acutonics Level I-IV Curriculum
